**F-150® Lightning™**

Intelligent Backup Power Capabilities

**WHAT CAN I POWER WITH MY TRUCK?**

With your charged F-150® Lightning™ and Home Integration System, you can provide up to 9.6kW of power at any given time to your home’s backed up devices. What does this mean? In a typical home, this might include:

**ESSENTIALS SUCH AS:**
- Lights
- WiFi
- Refrigerator
- Freezer
- Outlets (120V) (i.e. phone & computer charging)

**PLUS ONE OR MORE HIGH POWER APPLIANCES, SUCH AS:**
- Cooking stove/oven
- Water heater
- Sump pump
- Washer/dryer
- Heating or A/C†

Note: gas appliances that require electricity to start can also be backed up*

**HOW LONG CAN I POWER MY HOME‡ WITH MY TRUCK?**

**STANDARD RANGE:**
- Up to 2 days
- Up to 10 days powering a refrigerator

**EXTENDED RANGE:**
- Up to 3 days
- Up to 10 days powering a refrigerator

**WHAT CAN’T I POWER WITH MY TRUCK?**

Very high power draws such as the following cannot be backed up by your F-150® Lightning™:

- Hot tubs and spas
- Pool equipment
- EV chargers
- Multiple A/C or heating systems
- Elevators
- Medical devices

QUESTIONS? CALL SUNRUN’S FORD ADVISOR LINE AT 855-341-0237, OR ASK YOUR INSTALLER.

* When home is properly equipped. Every home is different, results may vary.
† May require additional equipment to enable backup capability. Check with your electrician or site auditor. Results may vary.
‡ When home is properly equipped and home transfer switch disconnects home from the grid. Based on 30kWh use per day using the F-150® Lightning™. Activation fee required for standard-range Lightning vehicles. Your results may vary based on energy usage. Rationing power refers to limiting the number of devices and turning the truck off when not needed.
